

If the app shows a blank blue screen, press Sync.  
The app will sync and bring up your current location plus nearby fuel outlets.

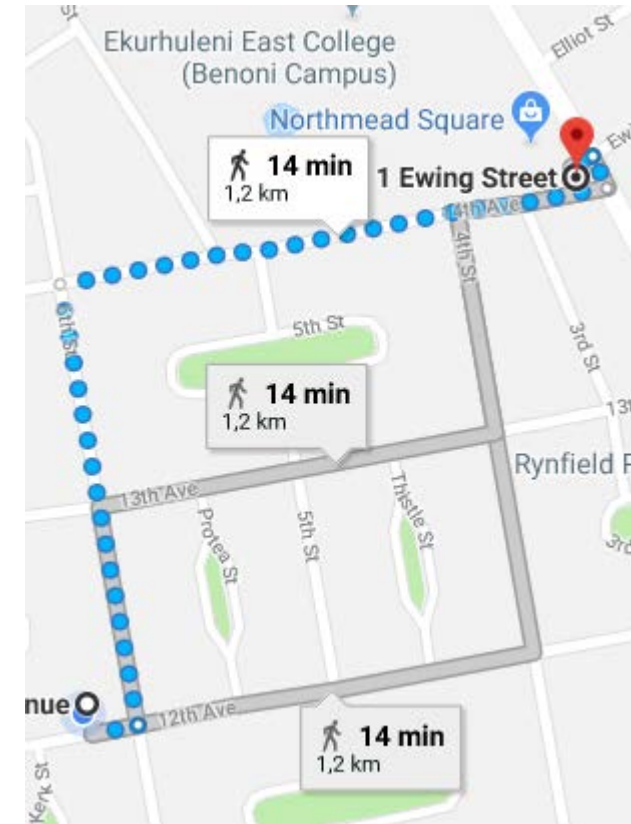

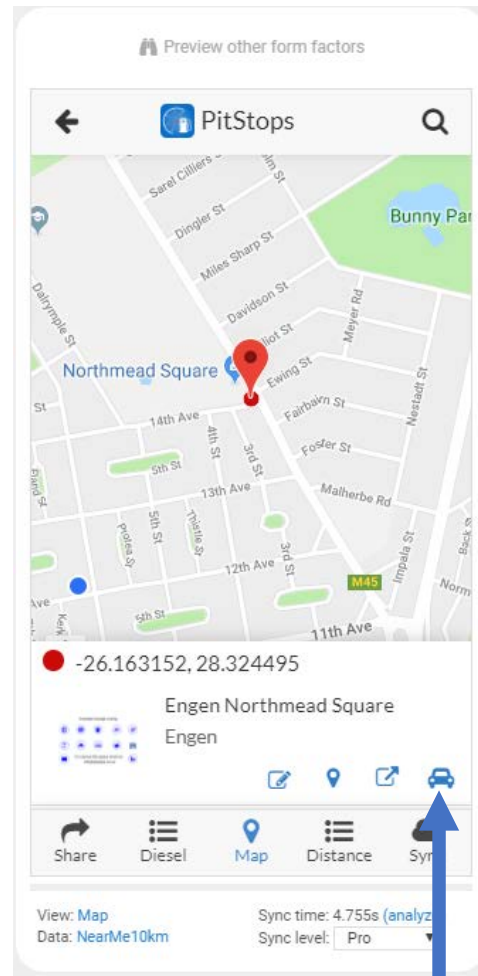

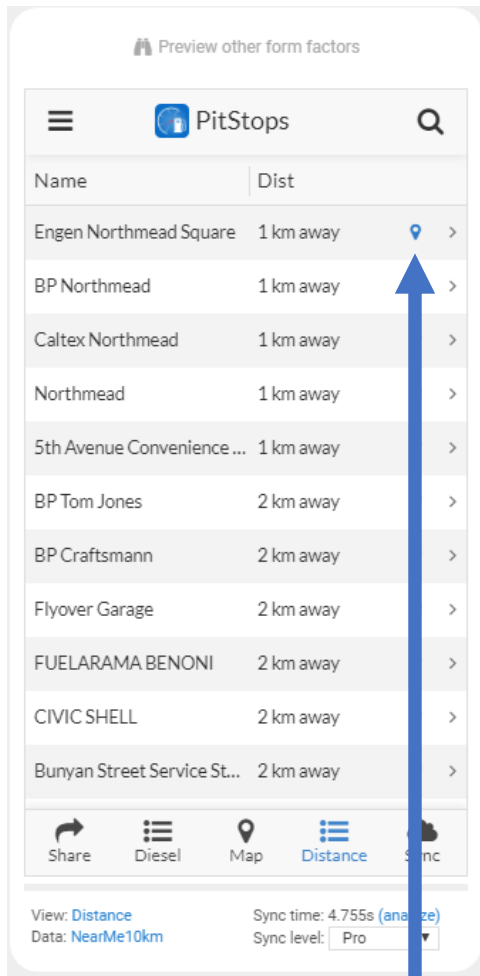

If the app shows a map with a blue dot, press Sync.  
The app will sync and feature a map with nearby fuel outlets.

If the app Diesel screen is blank, hit Sync.  
The app will sync and show best diesel prices within a 10km radius.

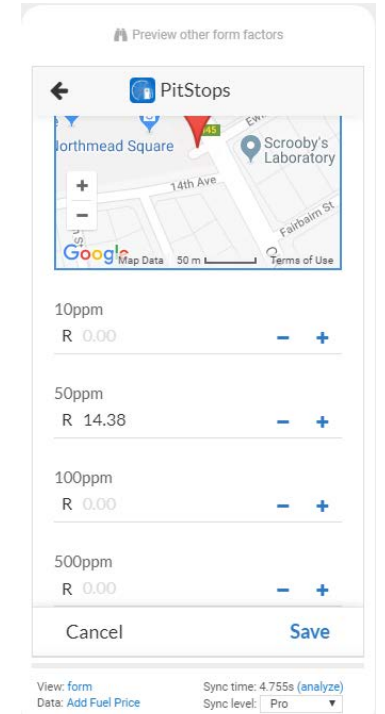

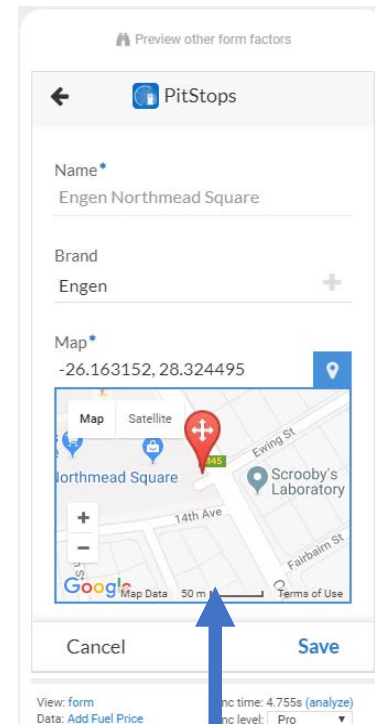

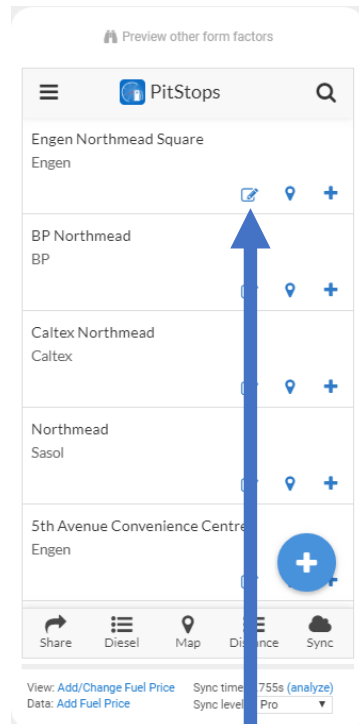

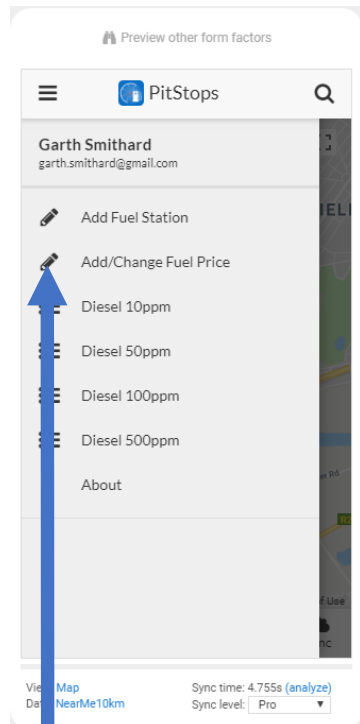

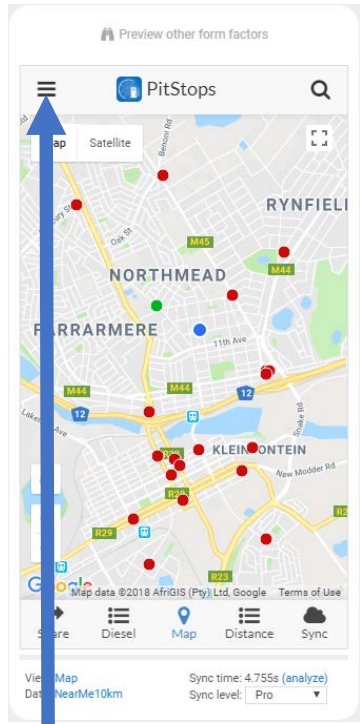

If the app Distance screen shows more than 4000km away, you REALLY, REALLY don't have to drive that far! Hit Sync. The app will sync and show the nearest fuel outlet.

If you're on the Diesel or Distance screen, press the location pin.

The app will show the location of that fuel outlet.

Press the car icon, this will bring up Google Maps with the best route to the pumps.

Once at the pumps, press the hamburger menu at the top.

Select Add/Change Fuel Price.

Select the pencil icon on the garage, then scroll down below the map to update fuel price.

Remember: press Save! Now you're helping others, just as they help you with info on prices.
